

Real moments. Real connections.

Radius™ 16 is the most automatic hearing instrument on the market, featuring spontaneous adaptation to changing sound environments and a host of advanced benefits powered by nFusion™ Technology.

RADIUS 16

Radius 16 is the leader among the Radius products

A hearing instrument unlike any other, the Radius 16 is powered by nFusion Technology—science on the molecular level—to deliver the most intelligent, the most intuitive hearing features ever designed.

Radius 16 is hands-free—it detects and adapts automatically to changing sound environments without manual adjustments. Ride in a noisy car and Radius adapts. Enter a busy restaurant and Radius adapts—all without touching a button.

Radius 16 sounds so natural, you may forget you're wearing a hearing aid.

Thousands of consumers have converted to Radius hearing systems after experiencing Active Feedback Intercept, nFusion technology's landmark feedback canceller. It virtually eliminates feedback, like whistling, squealing and other irritating sounds.

Radius 16 is a groundbreaking hearing instrument powered by nFusion technology, featuring:

Active Feedback Intercept (AFI) – the most effective feedback cancellation system on the market.

Acoustic Signature – A state-of-the-art sound management tool that automatically detects, classifies and adapts to different sound environments.

Directional Speech Detector (DSD) – Offers superb directionality and the quietest noise floor in hearing aid history; available on most styles.

Radius 16 offers a full package of advanced benefits including:

Voice Indicators – the option of using speech, with male or female voice, to alert you to low battery, memory, and other events.

Self-Check – Simply opening and closing the battery door three times runs a diagnostic check of the microphone, circuit and receiver.

Reminder – To help remind you of maintenance and return visits, we've included an audible follow-up reminder.

Colors – A full range of attractive colors are available on the Radius 16, making hearing not only effortless, but stylishly smart.

Micro-Tech's nFusion Technology

represents a groundbreaking advance in better hearing. The first instrument ever to use nanoscience in its design, Radius offers features never before possible: switching so automatic it responds to even the most dramatic environmental changes, effective feedback elimination, and a noticeably natural sound quality.

The best technology is designed with you in mind. That's nFusion. Find out how the powerful circuit inside Radius can bring the world of natural hearing back to you.

Located in Minneapolis, Minnesota, Micro-Tech was founded in 1986 on the philosophy that superior sound quality can be achieved while providing patients the small, stylish hearing instruments they desire. Today, Micro-Tech has earned a reputation as an industry leader in hearing instrument technology and the treatment of hearing loss.
