.....
A triumph
of art
and science.

MICRO-TECH.

Good looks are only the beginning.

The perfect marriage of cutting-edge technology and exquisite design, Curve is the only hearing solution on the market positioned to offer it all: extraordinary beauty, ultimate comfort, and best-in-class performance.

What makes Curve so supremely unique? **BluWave Signal Processing**, Micro-Tech's proprietary system, efficiently integrates Curve's best-in-class features to create the industry's best outcomes. When noise levels change as you move through different environments, your hearing aid changes with them. Unwanted whistling, otherwise known as feedback, virtually does not happen. And talking on the phone can be effortless and more enjoyable, since Curve automatically adjusts upon detecting a phone signal.

By any measure, Curve is the most advanced hearing solution on the market today. Designed to be as pleasing to the eye as it is to the ear, it provides the most natural hearing experience modern science has to offer.

Curve. The sound choice.

Micro-Tech Curve was compared to leading receiver-in-canal products from GN ReSound, Oticon (2 devices depicted), Phonak, Siemens and Unitron.

Enjoy life's simple pleasures.

The biggest problem hearing aid wearers experience is that annoying whistling called feedback, which can be caused by any number of things, such as hugging a loved one, having the hearing aid brushed by hair, or simply being outside on a windy day. Thanks to a breakthrough feature called **Active Feedback Intercept**, Curve hearing aids virtually eliminate buzzing and whistling, no matter what may have caused it in the past.

Hold a conversation anywhere.

Chances are you can hear the voices that are directly in front of you when in quiet situations, but have trouble when the noise level increases, like while in a restaurant with family and friends. With this common complaint in mind, Curve was designed to include technology called **Directional Speech Detector**, resulting in extraordinary directional performance and better understanding in noise. You've always wanted to hear individual voices in a crowd. Now you can.

Optimal listening on the phone.

Anyone who wears hearing aids knows telephone conversations can sometimes be difficult. With **Touchless Telephone Response**, Curve virtually eliminates feedback while automatically adjusting for optimal communication on the telephone.

Curve: Offering the widest range of options available.

Curve is the best receiver-in-canal product available on the market today with its best-in-class features optimized by BluWave Signal Processing. This hearing aid has been designed to perform well in the most challenging listening situations—in a restaurant, driving in a car or listening to a child’s voice.

Curve is available in three technology levels. Each one, as shown to the right, is designed to perform in specific listening environments. Depending on the nature of your listening needs, there is a Curve hearing aid that’s right for you.

Consult your local hearing professional to experience Curve today.

Looks as good as it listens.

Curve was designed to be just as advanced on the outside as it is inside, taking size, comfort, and style to a whole new level. How? Again, BluWave Signal Processing, which allows Curve to be made as small as possible, while still performing like no other hearing aid available today. Developed by industrial designers, researchers, and tested with patients for optimal comfort, ergonomic accuracy, and cosmetic fit in rich color options to complement and match hair and skin tones.

Curve, the ultimate hearing experience.
Try it on today.

Be confident
knowing you have
the best-in-class.
.....

Congratulations on your journey to improved hearing. Only one out of five people with hearing loss actually seeks help, so by visiting your hearing care professional, you've already taken a big step.

After being fitted with Curve, you'll have the satisfaction of knowing you're wearing one of the world's most advanced hearing aids: fully automatic, comfortable, and crystal clear.

Now, for the first time, Micro-Tech is offering a lifetime warranty on the circuit of the new Curve hearing aid. The hearing aid circuit is covered under warranty for the life of the product.

The Curve Lifetime Circuit Warranty is not transferable and does not apply to transducers, cases or mechanical components.
